info@gruparge.com

1. The RS-485 outputs of the device to be measured are connected to the USB-RS-485 converter and plugs into the computer's USB port. Checked from device manager.

2. The port opened by the connected RS-485 converter on the computer is selected with the "New" button at the top left.

3. Right click on the added port, with "New Device", device information are filled.

Add New Device	ce	×
Device Type	SmartSVC 12C:	•
Modbus Address	1	•
Device Name	Pano	
Baudrate	9600	•
Save	Quit	

4. The software will start automatic measurements after a while. By clicking on the device on the left, device-specific tabs and measured data can be viewed.
